# SUNSCREEN SHADES

Sunscreen Shades known as solar shading curtain are blocking harmful rays of the sun's ultraviolet rays. Sunscreen Shades contain glass fibers so that providing heat savings. It also prevents any reflections on television and computer screen due to penetrating day light. Optionally, these shades can be produced in a systematic control spring or chain. It is quite long lasting and washable.

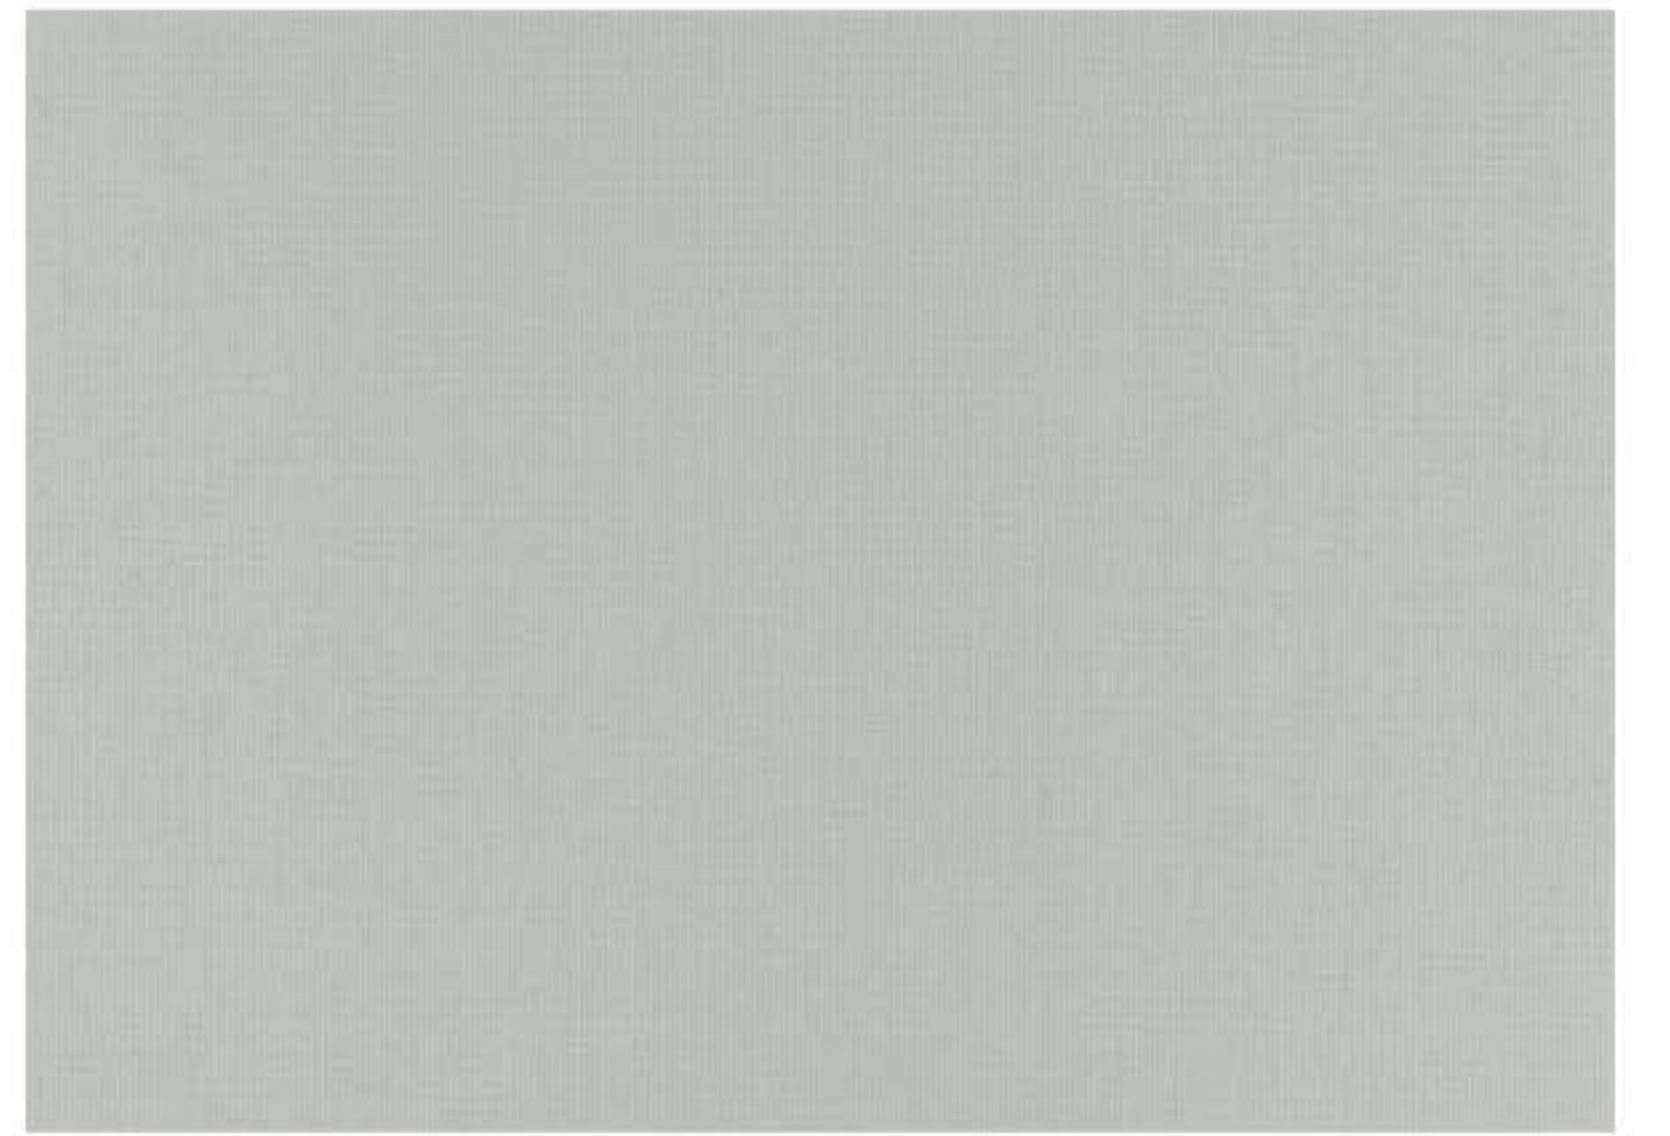

# BLACKOUT SHADES

Blackout shades are window coverings designed to block out the majority of light entering a room. They are typically made of a heavy-duty, opaque material that blocks incoming light, making them ideal for use in bedrooms, media rooms, or any other space where you need to control the amount of light entering.

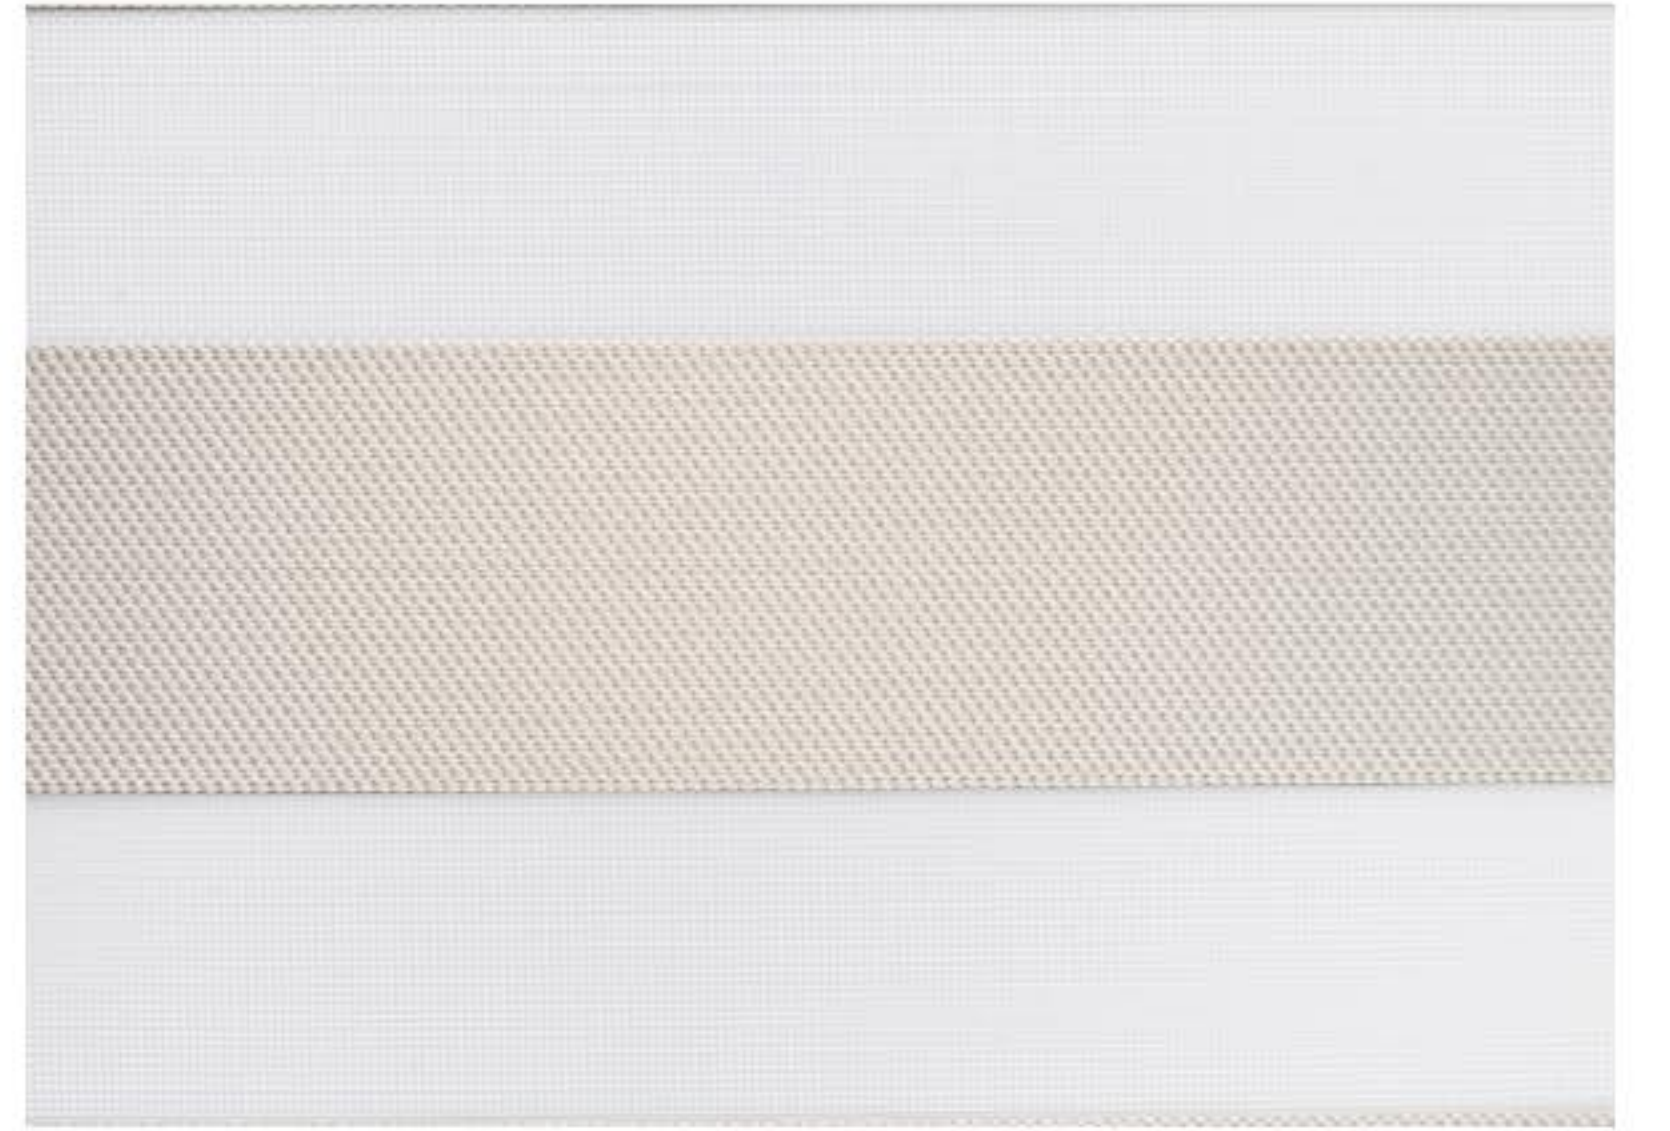

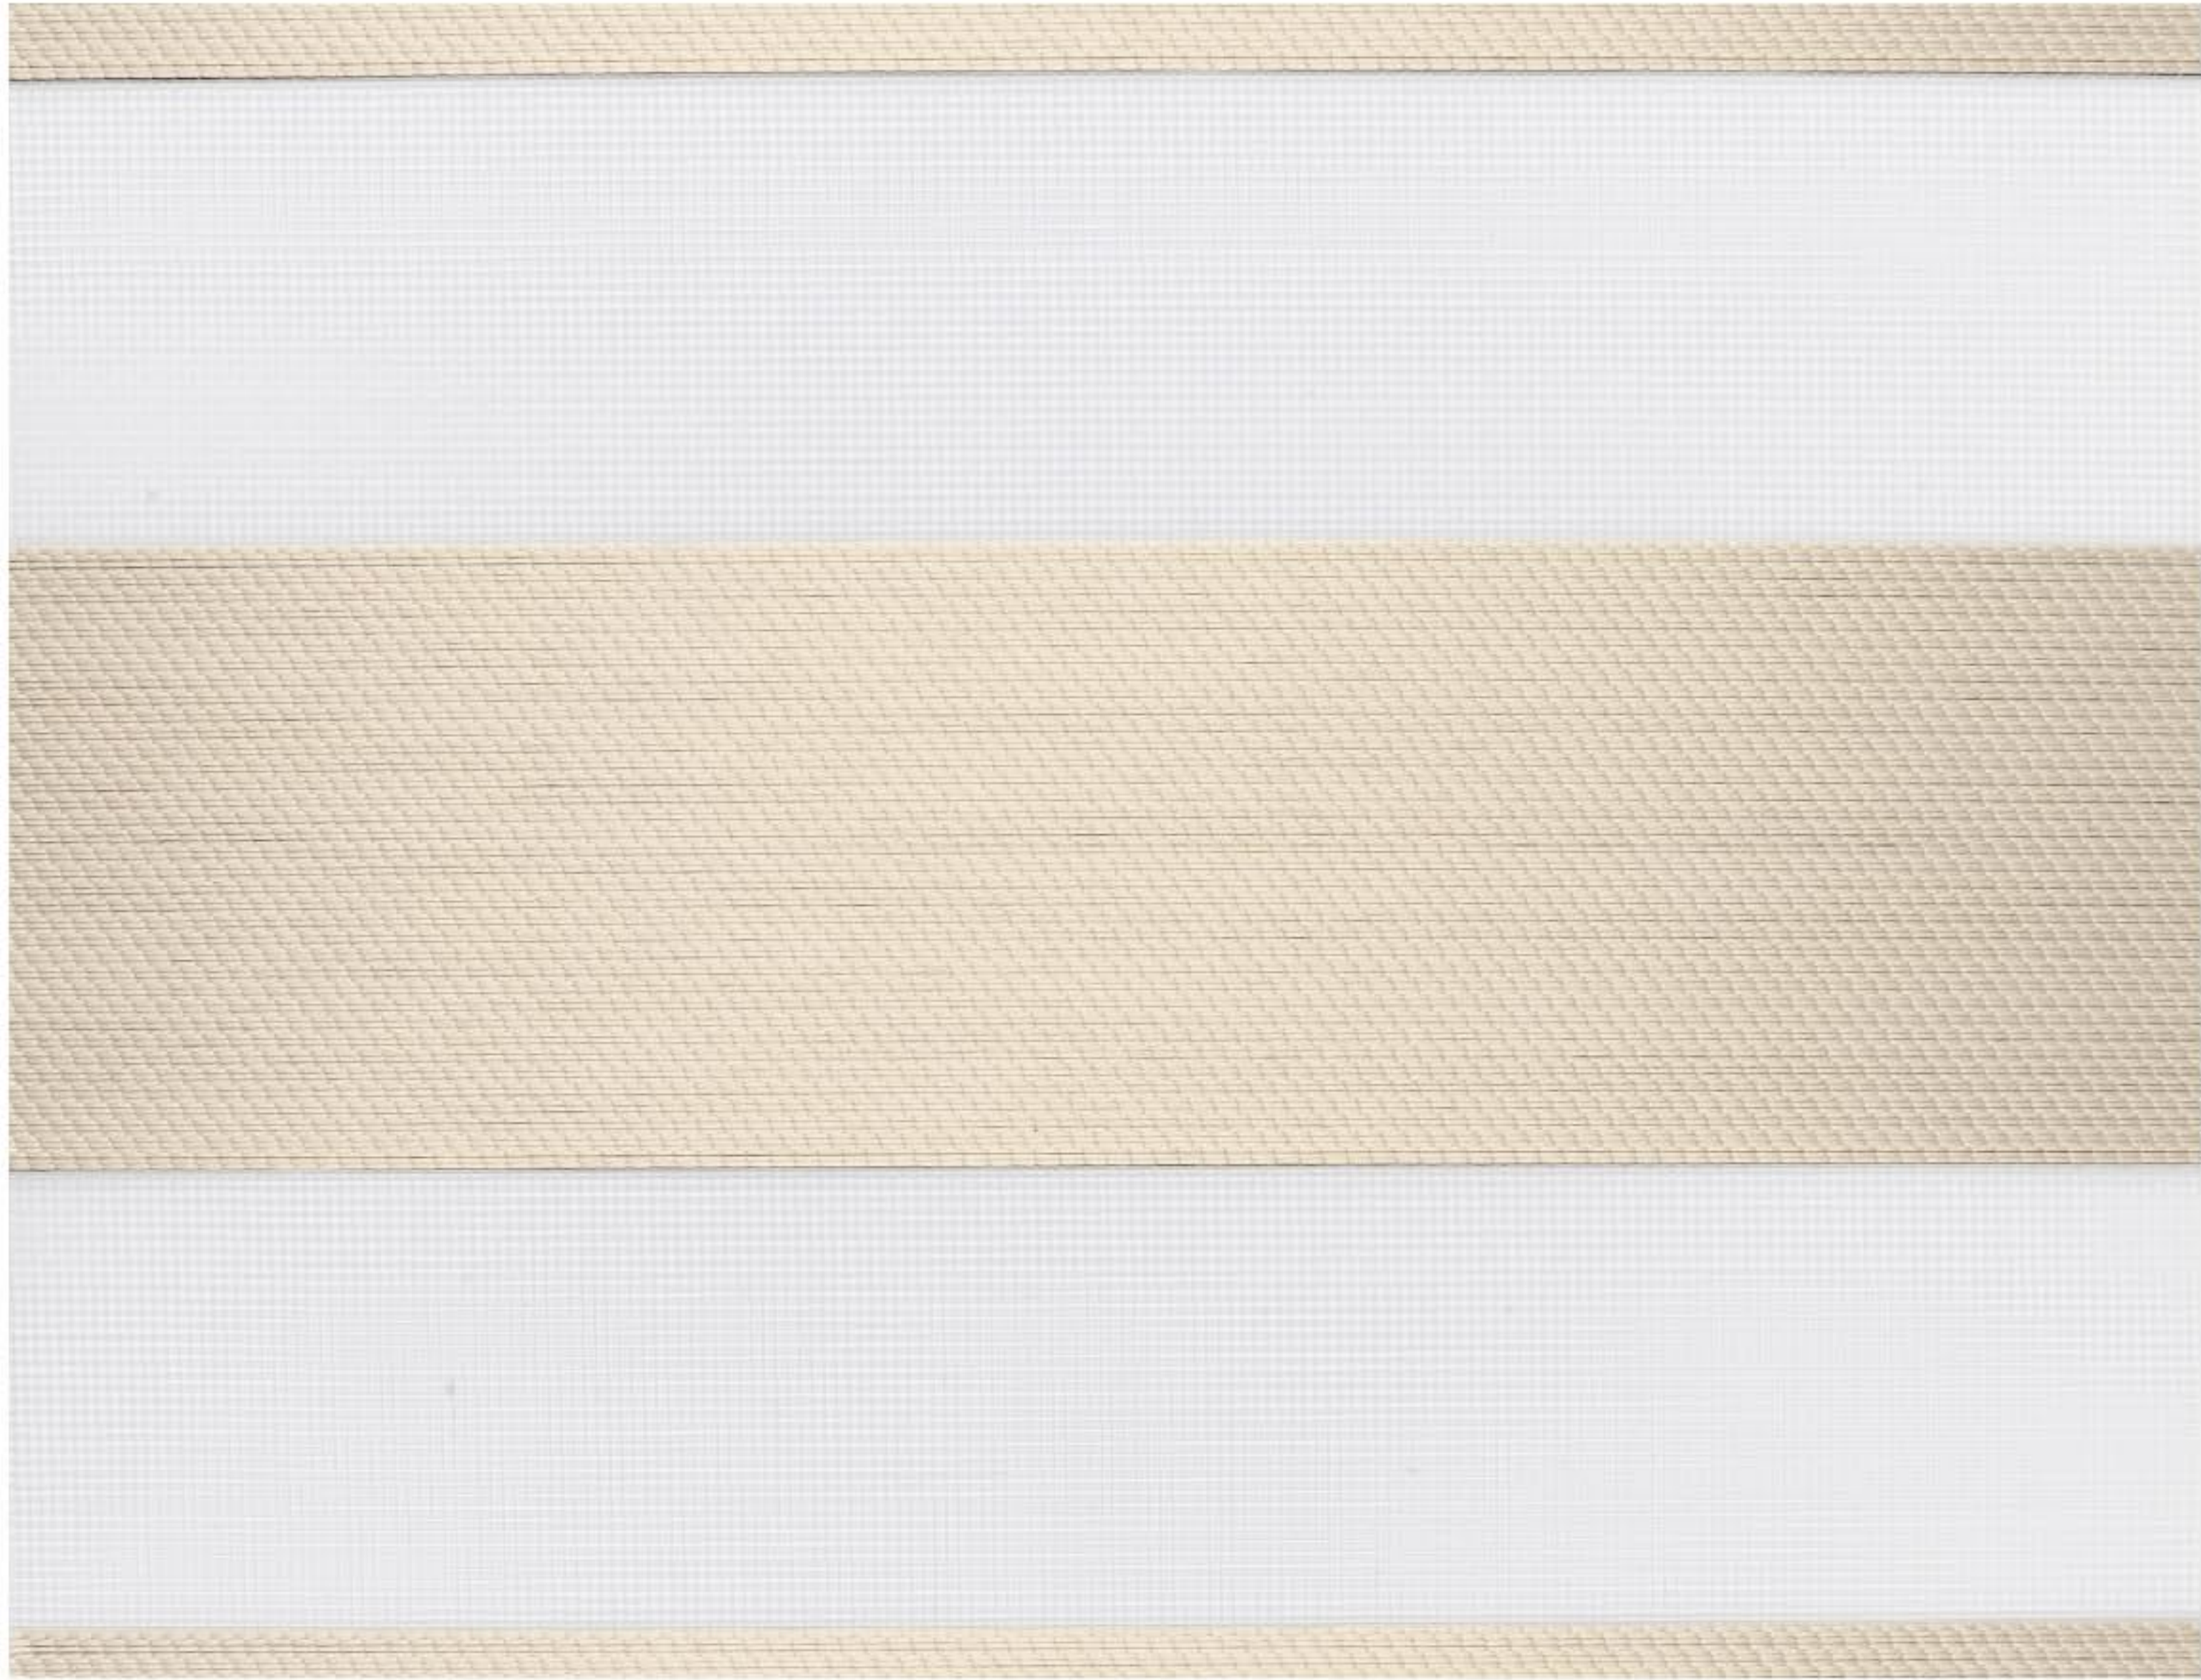

# SHEER SHADES

Sheer shades are a type of window covering that provide a delicate balance of privacy and light control. They are made of transparent or semi-transparent material that allows light to filter into the room while still providing some level of privacy. Sheer shades often feature a light-diffusing layer that softens incoming light and reduces glare, making them a popular choice for living rooms, kitchens, and other spaces where you want to maintain a bright, airy feel while still enjoying some degree of privacy.

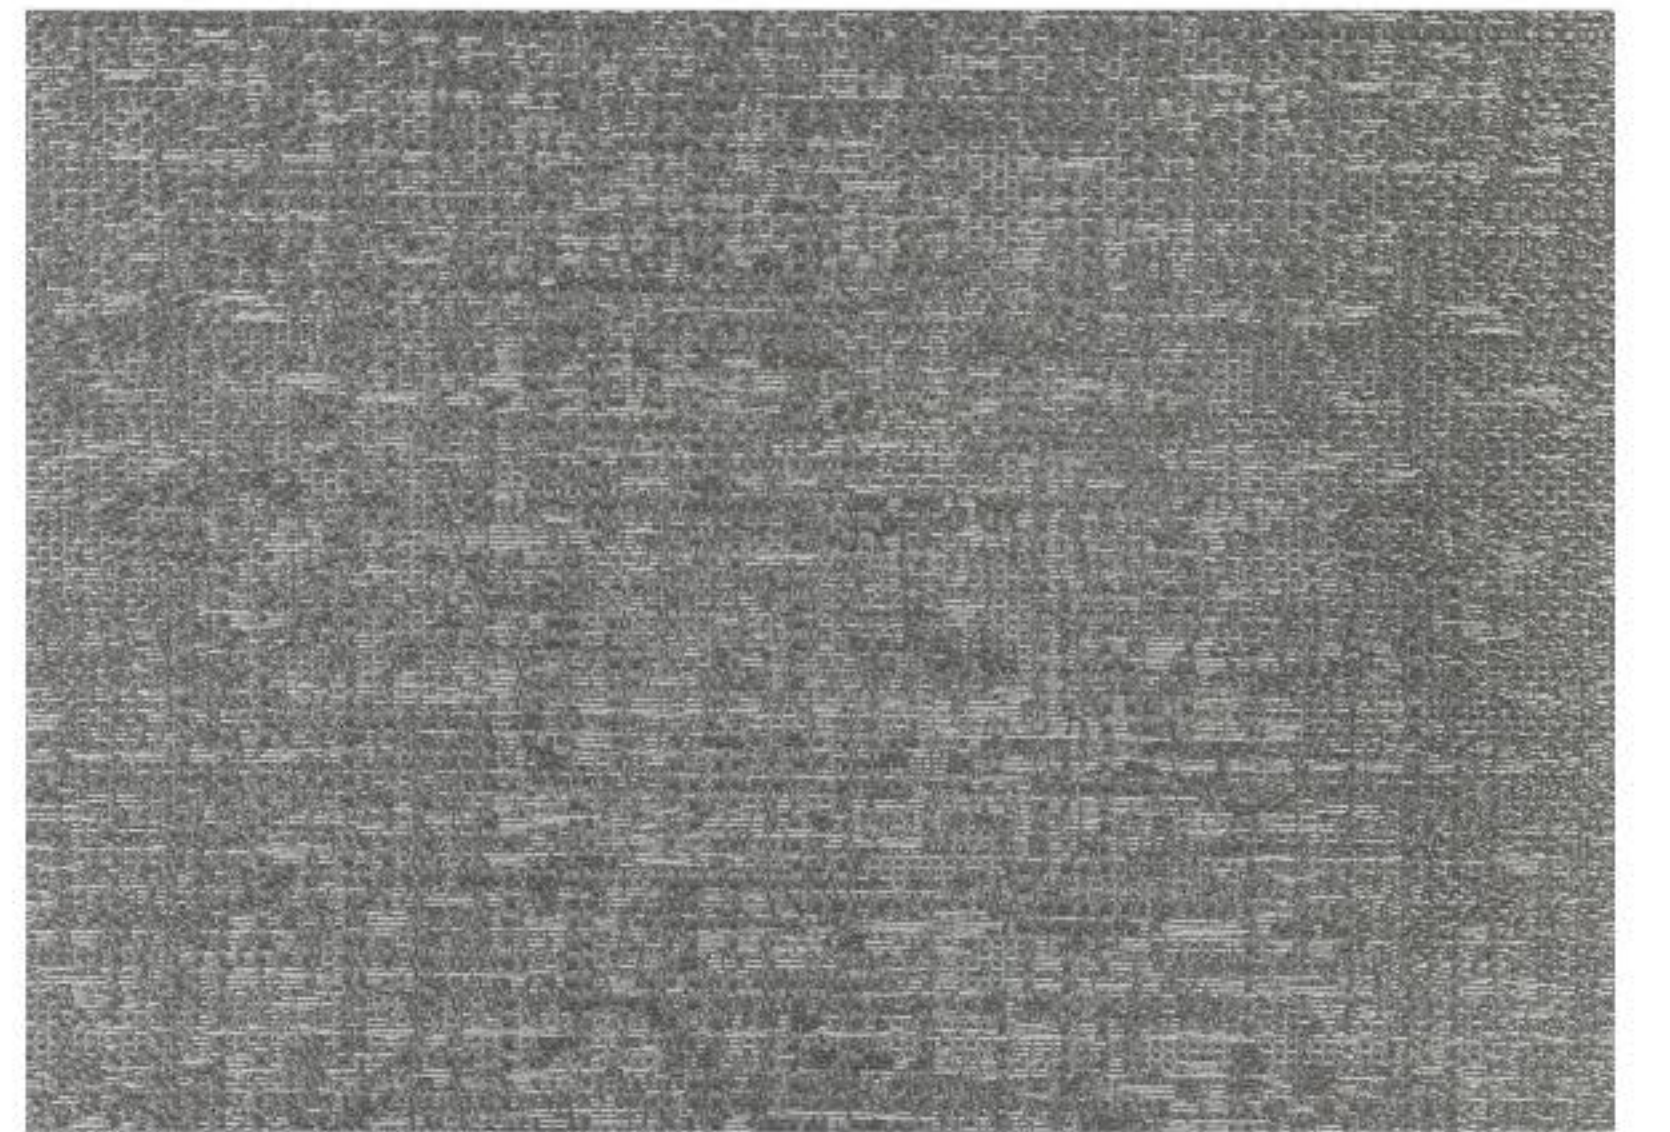

# ROLLER SHADES

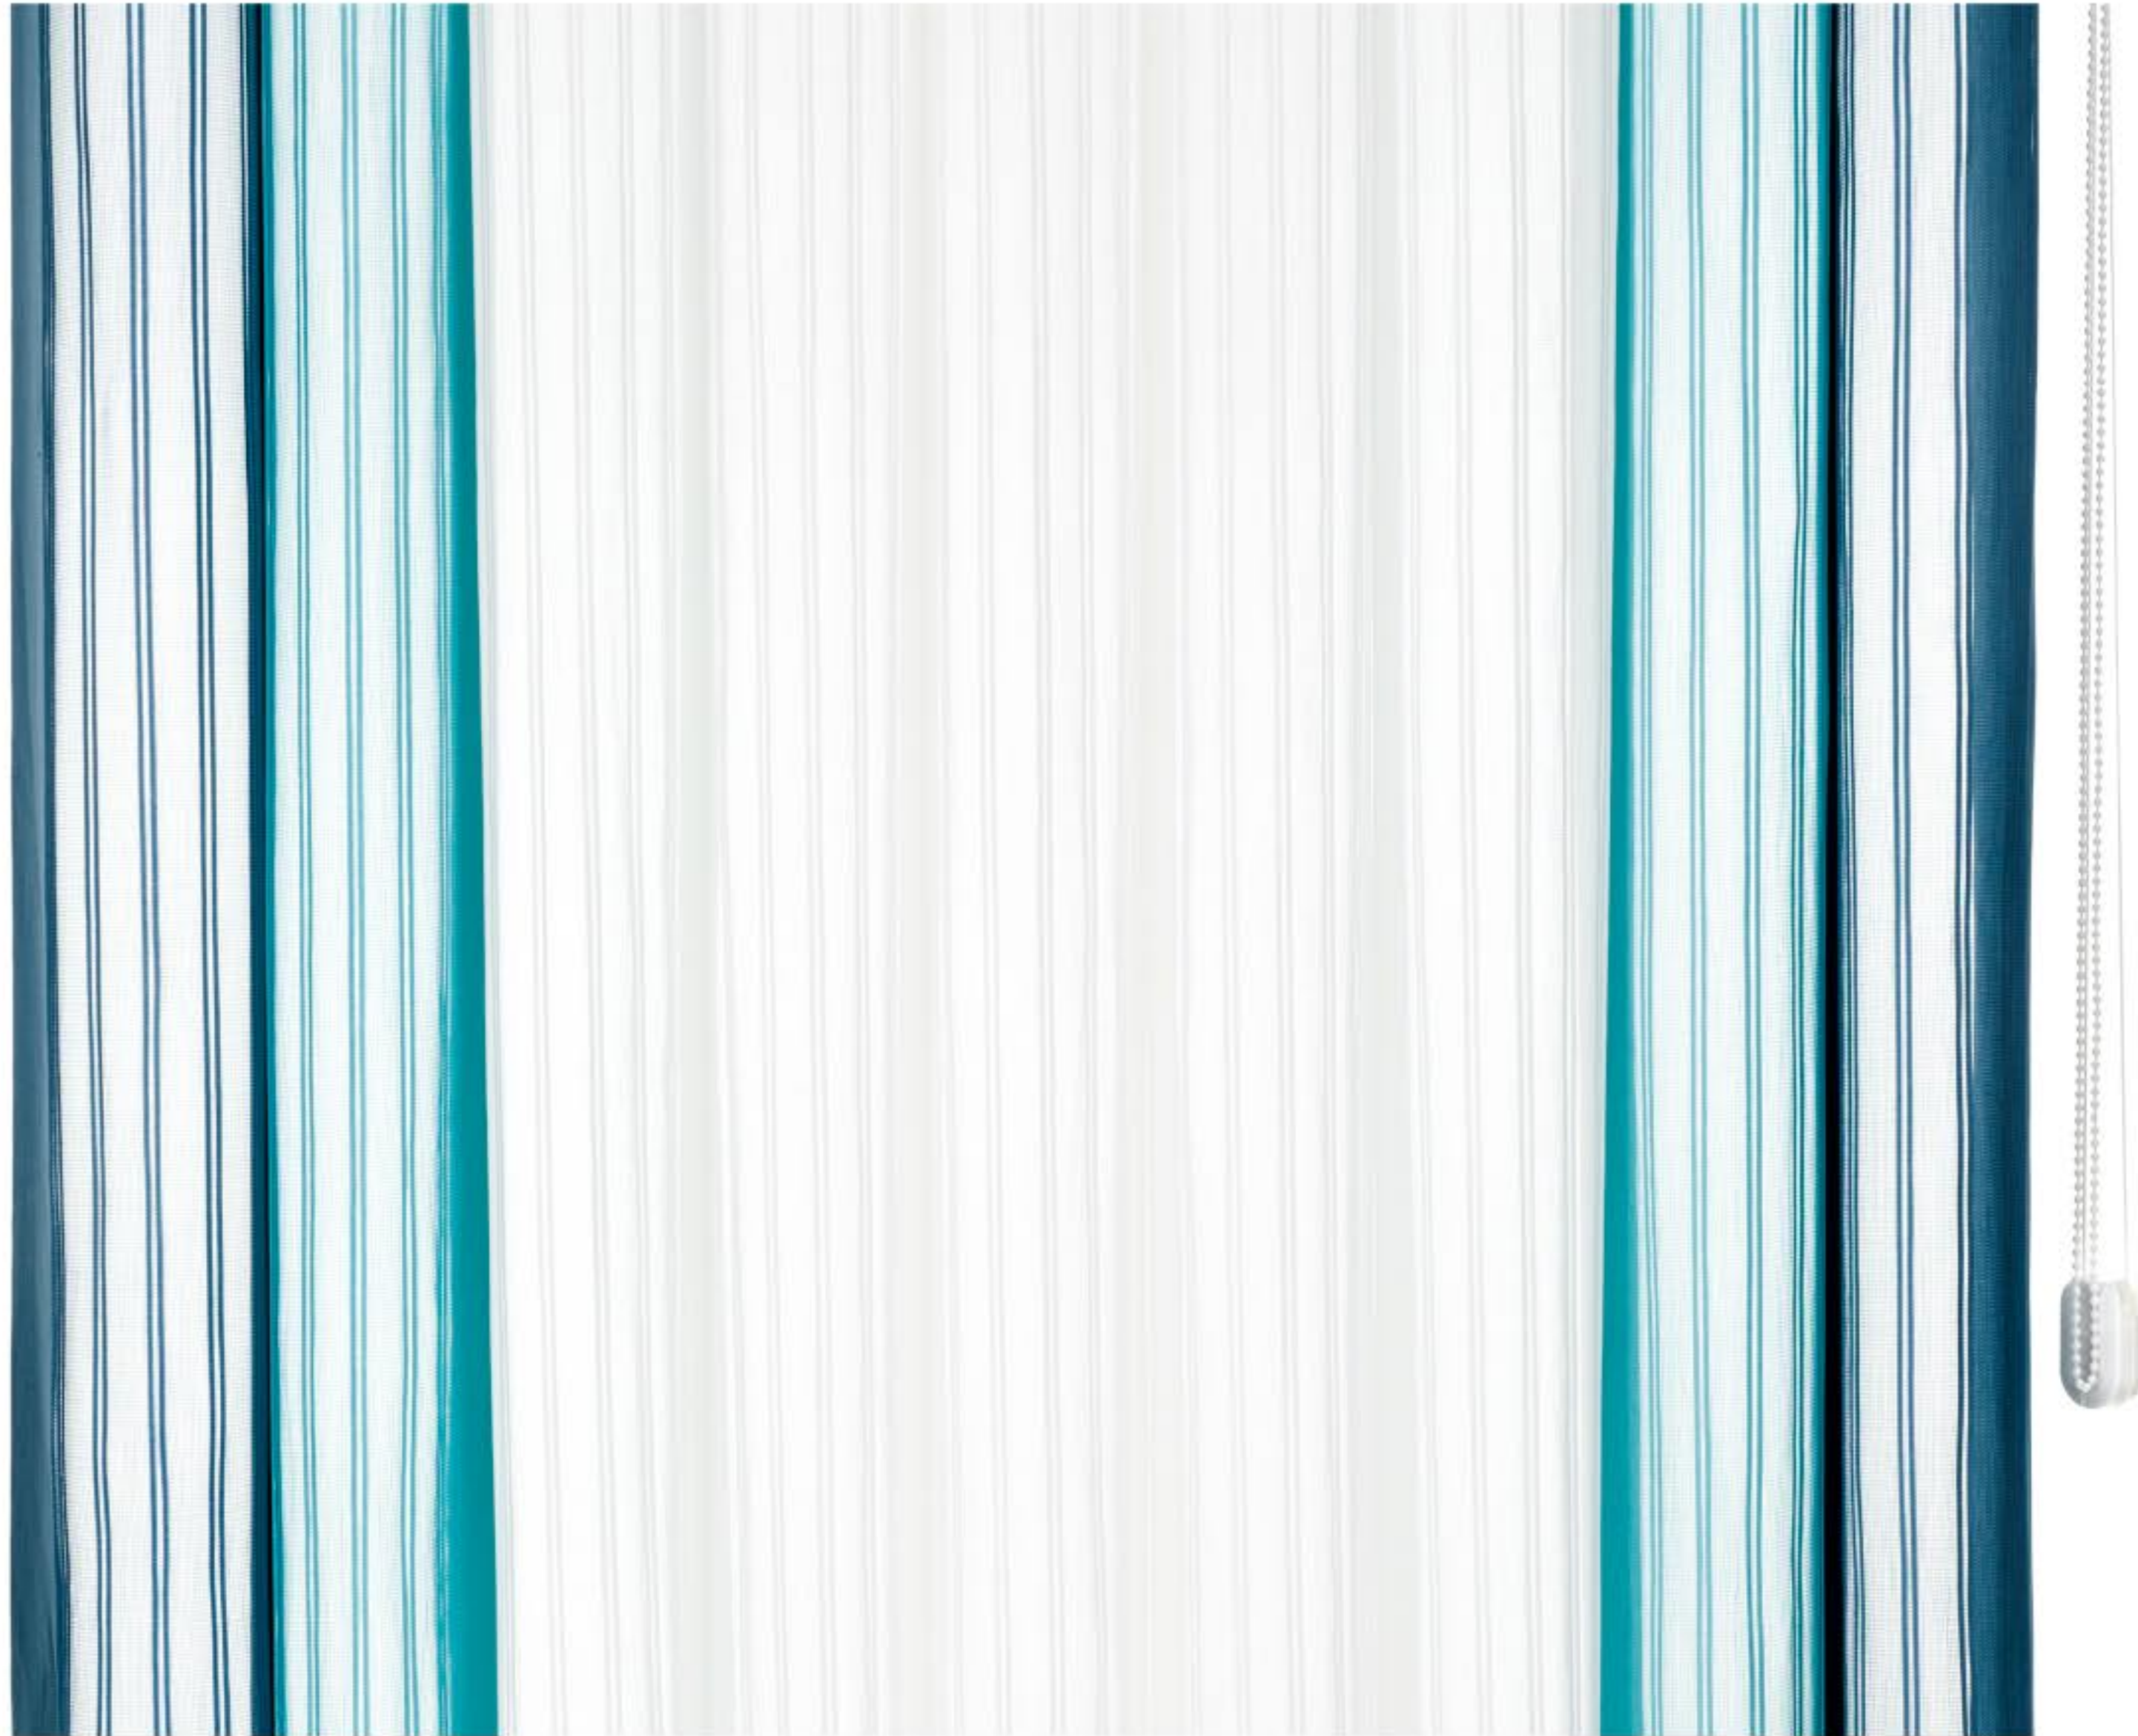

Roller shades are a type of window covering that consists of a piece of fabric or material attached to a roller mechanism. When not in use, the shade is rolled up and contained within a small, compact housing at the top of the window. To use the shade, you simply pull it down to cover the window. Roller shades can be made of a variety of materials, including fabrics, vinyl, or even bamboo, and they can be designed to provide different levels of light control, from sheer to blackout. They are a popular choice for their simplicity, versatility, and affordability.

WE ALSO OFFER VERTICAL SHEER SHADES, WOODEN VENETIAN BLINDS AND MORE.

WE HAVE DIFFERENT CASATTE OPTIONS FOR ANY SPACE.
